CARBON REDUCTION PLAN GUIDANCE

Notes for Completion

Where an In-Scope Organisation has determined that the measure applies to the procurement, suppliers wishing to bid for that contract are required at the selection stage to submit a Carbon Reduction Plan which details their organisational carbon footprint and confirms their commitment to achieving Net Zero by 2050.

Carbon Reduction Plans are to be completed by the bidding supplier¹ and must meet the reporting requirements set out in supporting guidance and include the supplier's current carbon footprint and its commitment to reducing emissions to achieve Net Zero emissions by 2050.

The CRP should be specific to the bidding entity, or, provided certain criteria are met, may cover the bidding entity and its parent organisation. In order to ensure the CRP remains relevant, a Carbon Reduction Plan covering the bidding entity and its parent organisation is only permissible where the detailed requirements of the CRP are met in full, as set out in the Technical Standard² and Guidance³, and all of the following criteria are met:

- The bidding entity is wholly owned by the parent;
- The commitment to achieving net zero by 2050 for UK operations is set out in the CRP for the parent and is supported and adopted by the bidding entity, demonstrated by the inclusion in the CRP of a statement that this will apply to the bidding entity;
- The environmental measures set out are stated to be able to be applied by the bidding entity when performing the relevant contract; and
- The CRP is published on the bidding entity's website.

Bidding entities must take steps to ensure they have their own CRP as soon as reasonably practicable and should note that the ability to rely on a parent organisation's Carbon Reduction Plan may only be a temporary measure under this selection criterion.

The Carbon Reduction Plan should be updated regularly (at least annually) and published and clearly signposted on the supplier's UK website. It should be approved by a director (or equivalent senior leadership) within the supplier's organisation to demonstrate a clear commitment to emissions reduction at the highest level. Suppliers may wish to adopt the key objectives of the Carbon Reduction Plan within their strategic plans.

A template for the Carbon Reduction Plan is set out below. Please complete and publish your Carbon Reduction Plan in accordance with the reporting standard published alongside this PPN.

¹Bidding supplier or 'bidding entity' means the organisation with whom the contracting authority will enter into a contract if it is successful.

Carbon Reduction Plan Template

Supplier name:SV365 Technologies Ltd.....

Publication date:March 2024.....

Commitment to achieving Net Zero

Sv365 Technologies is committed to achieving Net Zero emissions by 2030.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2024

Additional Details relating to the Baseline Emissions calculations.

We are dedicated to taking proactive steps to reduce our carbon footprint and contribute to a sustainable future. Below is an outline of our plan, including baseline emissions, baseline year, new baseline emissions calculations, and our targets for achieving net zero emissions.

We have recently pivoted our business to deliver a range of automated hot food solutions, hence no historical baseline.

Baseline Emissions Footprint:

Baseline Year: 2024

After conducting a thorough review of our operations and emissions sources, we are recalculating our baseline emissions to reflect a more accurate representation of our carbon footprint.

Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	5.6
Scope 2	1.5
Scope 3 (Included Sources)	13.6
Total Emissions	19.3 tCO₂e

Current Emissions Reporting

Reporting Year: 2024	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	Direct emissions for the combustion of fuel in assets that our company operate, such as fuel emissions from company owned vehicles.
Scope 2	Indirect emissions from the generation of energy purchased, from our utility provider to heat/cool our warehouse/offices
Scope 3 (Included Sources)	All indirect greenhouse gas emissions that do not fall under scope 2
Total Emissions	XX

Emissions reduction targets

To continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 12.0tCO₂e by 2029. This is a reduction of almost 40%

Carbon Footprint

● Scope 1 27.1%

● Scope 2 7.1%

● Scope 3 65.8%

Emissions by Category

● Heating	12.7%
● Office waste	2.4%
● Depreciation of vehicles	60.6%
● IT	13.6%
● Electricity	10.7%

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

We understand the importance of taking immediate action to address climate change and are dedicated to implementing measures that will help us achieve our net zero emissions goal. We will regularly monitor our progress, adjust our strategies as needed, and transparently report on our performance to stakeholders. Should you require any additional information or have further inquiries, please do not hesitate to reach out?

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard⁴ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting⁵.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁶.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

.....Walter Gill SV365 Technologies.....
